

Agitator (AG)

Low-Speed Mixer: Ideal for Low Viscosity Blending Operations

The Agitator (AG-Series) is a paddle and low-speed mixer, perfect for low viscosity blending operations and downstream processes. Made from high-quality steel with precision shaft-to-bearing alignment, it ensures efficiency, reliable processing, and durability while minimizing downtime.

Its unique strength lies in its customization capabilities, allowing for precise mixer selection and sizing, ensuring optimal, tailored performance. Energy optimization is a key design element, reducing energy usage for cost-effective operation.

User-friendly and requiring minimal maintenance, the Agitator serves as a go-to solution for diverse industries, blending efficiency, customization, and ease of use in blending operations.

Paddle and Low-Speed Mixer

Ideal for low viscosity blending operations.

Customization

Expert advice and support for mixer selection and capacity customization.

Versatile & Efficient

Handles High and Low Viscosity Mill Bases

Hygienic Design

Stainless Steel Tank & Pocketless Valve for Easy Cleaning.

Durable

Built for longevity and minimal downtime. High quality steel

Energy-Optimized

Low energy consumption for cost-effective operation

SCADA + HMI Control & Monitoring Option

Hygienic Design Option

Hazardous Environment Option

Model	Motor (kW)	Speed (m/s)
AG-3	2.5	9
AG-5.5	4	9
AG-7.5	5.5	9
AG-10	7.5	9
AG-15	11	9
AG-20	15	9
AG-30	22	9
AG-40	30	9
AG-50	37	9
