

Planetary Mixer (PVM)

High-Powered Mixing: Efficient and Versatile for High-Viscosity Products

The Planetary Mixer (PVM-series), a robust, floor-bound unit, is an expert at managing high-viscosity and thixotropic products. Its precision-aligned, high-balance shaft ensures efficient, reliable performance. Its construction from high-grade steel underscores durability and minimizes downtime.

Distinguished for its versatility, this mixer effectively handles mill bases of varying viscosity, enabling efficient single-tank operations. The design, optimized for energy, promotes lower power consumption and cost efficiency. High hygienic standards are assured via an easy-to-clean stainless steel jacketed tank and pocketless valve.

The Planetary Mixer is a multifunctional, high-quality, and energy-efficient solution for various industries. It emphasizes operational simplicity, durability, and key features such as high horsepower, precision engineering, energy optimization, and a user-friendly, hygienic design.

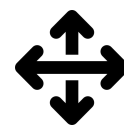

High Horsepower

High-powered performance for handling high viscosity and thixotropic products.

Hygienic Design

Stainless Steel Tank & Pocketless Valve for Easy Cleaning

Versatile & Efficient

Handles High and Low Viscosity Mill Bases

Hygienic Design

Stainless Steel Tank & Pocketless Valve for Easy Cleaning.

Durable

Built for longevity and minimal downtime. High quality steel

Energy-Optimized

Low energy consumption for cost-effective operation

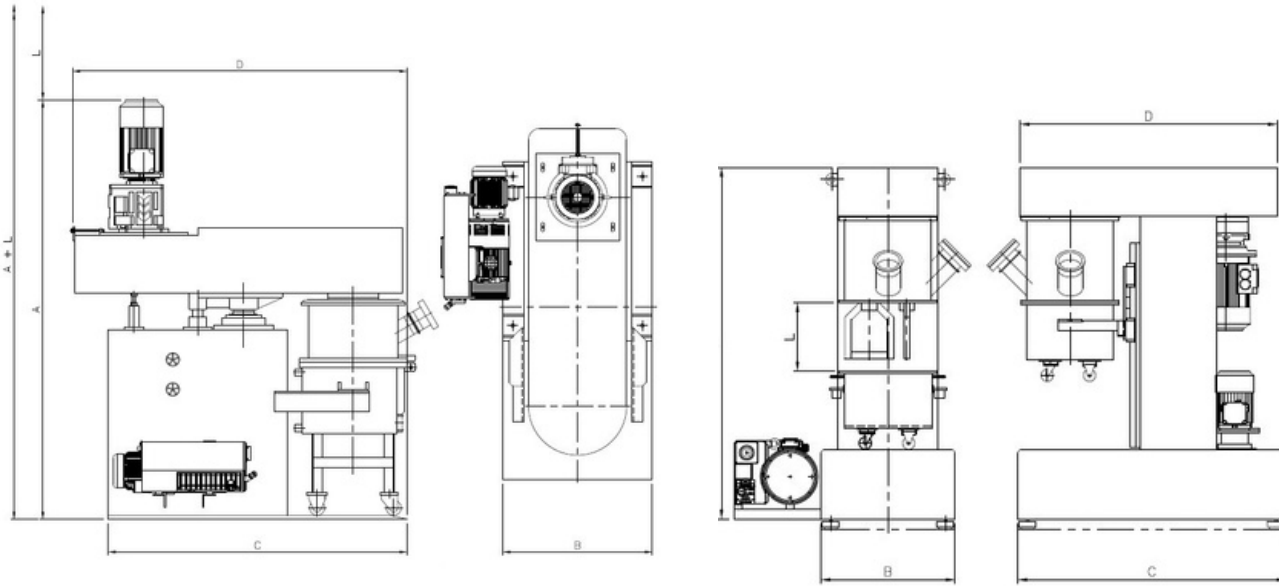

SCADA + HMI Control & Monitoring Option

Hygienic Design Option

Hazardous Environment Option

Model	Motor (kW)	Speed Revolving (rpm)	Speed Turn on Axis (rpm)	Total Tank Caps (l)	Weight (kg)	A (mm)	B (mm)	C (mm)	D (mm)	L (mm)	A+L (mm)
